

Students Together Moving to Prevent Commercial Tobacco, Vaping, Alcohol, and Cannabis Use

Investing in STOMP can:

Make a Tangible Impact on Student Health – through investing in STOMP, you'll be instrumental in curbing the use of commercial tobacco, vaping, alcohol, and cannabis use among students, addressing a critical public health issue while providing the resources and education necessary for healthier decision-making.

About STOMP

STOMP is a comprehensive program designed to help students make informed, healthier decisions regarding tobacco, vaping, alcohol, and cannabis use.

The program is adaptable and scalable, allowing for implementation in one school, district or even schools across the province/territory – with proven results in reducing vaping use among school-aged youth.

By investing in STOMP, you will

Engage Students in Quality Health Education: STOMP provides interactive resources that teach students about the harms associated with substance use and equips them with tools to organize and lead events and campaigns within their school communities.

Promote a Substance-Free Environment: STOMP aligns with your school's commitment to promoting healthy, drug-free lifestyles and supports your existing wellness initiatives.

Empower Educators: Through training and ongoing support, STOMP helps educators address these sensitive topics effectively, fostering a supportive school environment.

Provide Community-Wide Impact: STOMP isn't just a program for students—it involves the entire school community, including parents and local organizations, in the curbing substance use and related-harms among youth.
